If one of this file is your intelectual property (copyright infringement) or child pornography / immature sounds, please or email to info[at]aiohows.. I was distracted and didn't make any notes The three way switches actually do not use the netural therefore you have a white traveller conductor (wire) the three way switch are differnt than the single pole switch are so with three way switch the dark coloured screw is common while the bright brass screws are your traveller screws (in France I call them shuttle conductors) what kind of plug are you referering to in the garage which it have differnt circuit? On the motion sensor side (in the house not in the garage) I have swapped out light switches..
